ABOUT

I have approximately 4 years of experience working as a frontend developer, focused on writing clean, maintainable code and following the best practices such as SOLID, KISS, YAGNI and DRY. Most of my skills are acquired through self-teaching and prepared to carry out tasks outside of my job description when needed. I have a solid understanding in SSR and CSR, caching and performance optimizations to ensure the web application is fast and consistent.

WORK EXPERIENCE

OLE Elite Software Philippines, Inc. - Web Developer

September 14, 2020 - April 15, 2024

As a web developer, my duties and responsibilities are the following:

- ❖ Designing and developing user interface using modern frontend technologies.
- ❖ Translating designs from Figma/AdobeXD to a web component.
- ❖ Conducting unit, integration, load and security testing to ensure the quality of the web application.
- ❖ Collaboration with UI/UX designers to ensure the mockup designs are feasible and follows the principles of web accessibility.
- ❖ Collaboration with backend developers to ensure the implementation of API is secure and efficient.
- ❖ Writing documentations for future reference.
- ❖ Creating a Github Action pipeline for continuous integration and deployment.
- ❖ Debugging issues and resolving tickets given by the software engineer.
- ❖ Maintaining and improving the web application features over time.

TECH STACK [actual years of experience]

- | | | |
|---------------------|---------------------------|---------------------------|
| ❖ [4] ReactJS | ❖ [4] GIT | ❖ [2] Github Actions |
| ❖ [4] VueJS | ❖ [4] NGINX | ❖ [2] FCM, Firebase |
| ❖ [4] JavaScript | ❖ [4] CSS, SASS | ❖ [1] MongoDB |
| ❖ [4] Webpack | ❖ [4] Semantic HTML | ❖ [1] GraphQL |
| ❖ [4] ExpressJS | ❖ [4] Web Accessibility | ❖ [1] NextJS |
| ❖ [4] NodeJS | ❖ [3] RESTful APIs | ❖ [1] AWS EC2, EKS |
| ❖ [4] Docker | ❖ [3] mySQL | ❖ [1] Jenkins |
| ❖ [4] Kubernetes | ❖ [3] PWA, Workbox | ❖ [1] RTL, Jest, Vitest |
| ❖ [4] Redux, Vuex | ❖ [2] TypeScript | ❖ [1] Sequelize ORM |
| ❖ [4] BootStrap | ❖ [2] TailwindCSS | ❖ [1] Bitbucket |

PROJECTS

Some previews are uploaded and available at <https://lenn0n.xyz/demo>

YAZSEE

Started in 2020, a video streaming website like Youtube that offers opportunities for small content creators to monetize their content. The users can upload videos, go live streaming, set a premier video, create a blog, follow content creators and earn points.

- ❖ Tech Used: **React, JavaScript, Redux, Webpack, Bootstrap, SASS, NGINX, Express etc..**
- ❖ Link: yazsee.com (no longer available)

OLE PLATFORM

Started in 2016, provides multi-currency and multi-asset wallet payment solutions that allows you to make safe and secure digital money transfers and payments.

- ❖ Tech Used: **React, Vue, TypeScript, Redux, Vuex, TailwindCSS, Plaid, NGINX etc...**
- ❖ Link: user.oleplatform.com (no longer available)

WORLDRAFT MLM

Started in 2022, a multi-level marketing for Worldcraft PH. WorldCraft is a subsidiary of Filipinas Multi-line Group of Companies which has been in the importation business for more than 35 years.

- ❖ Tech Used: **VueJS, JavaScript, Vuex, Axios, Vis.js, Vanilla, Webpack, CryptoJS, Vitest etc...**
- ❖ Links: worldcraft.biz, agrixz.com.ph, bitcointradingclub.com (all no longer available)
- ❖ WCPH: <https://worldcraft.com.ph/about-us> (available)

VACAYBUCKS

Started in 2024, a subscription-based discount platform that offers exclusive savings on hotels, car rentals, restaurants, movie tickets, theme parks, and more.

- ❖ Tech Used: **ReactJS, TypeScript, Redux, TailwindCSS, Webpack etc...**
- ❖ Link: <https://vacaybucks.com> (available)
