ABOUT

Frontend Developer with four (4) years of hands-on experience in crafting responsive and user-centric web applications. Proficient in a wide range of technologies including React, Vue, Tailwind CSS and TypeScript. Additionally, possess a solid understanding of DevOps principles, ensuring seamless integration and deployment processes.

TECH SKILLS

- ReactJS
- VueJS
- TypeScript
- Javascript
- TailwindCSS
- Webpack
- ExpressJS
- Sequelize
- CI/CD
- Github Actions
- REST Api
- mySQL
- NodeJS
- Docker
- Kubernetes
- AWS, Alibaba, DO
- Redux, Vuex
- Bootstrap
- Git
- NGINX
- Firebase
- SASS, LESS
- HTML, CSS
- NextJS
- Socket.io
- RTL/Jest/Vitest
- Google FCM
- PWA, Service Worker
- i18n, a11y
- React Hooks

WORK EXPERIENCE

OLE Elite Software Philippines, Inc. - *Web Developer*

September 14, 2020 - April 15, 2024

As a web developer, my duties and responsibilities are:

1. Designing and developing user interface using modern frontend technologies.
2. Translating designs from Figma/AdobeXD to a web component.
3. Conducting unit, integration, load and security testing to ensure the quality of the web application.
4. Collaboration with UI/UX designers to ensure the mockup designs are feasible and follows the principles of web accessibility.
5. Collaboration with backend developers to ensure the implementation of API is secure and efficient.
6. Writing documentations for future reference.
7. Creating a github action pipeline for continuous integration and deployment.
8. Debugging issues and resolving tickets given by the software engineer.
9. Maintaining and improving the web application features over time.

PROJECTS

YAZSEE

Started in 2020, a video streaming website like Youtube that offers opportunities for small content creators to monetize their content. The users can upload videos, go live streaming, set a premier video, create a blog, follow content creators and earn 'keys' every time someone unlocks their content.

“ This was my first project as a front-end developer. The project was divided into 5 services: Login/Signup, Video, Live, Blogs and Creator. I have worked in each service and deployed it separately. The most challenging part here is everything is new to me. I have to think in React way. I have implemented Socket.io for live chat and notifications, dealt with Safari web player issues and followed the best practices.”

OLE PLATFORM

Started in 2016, provides multi-currency and multi-asset wallet payment solutions that allows you to make safe and secure digital money transfers and payments from anywhere in the world.

“ I started to work on this project in 2021. A micro frontend application, worked on different services and used different programming languages. The most challenging part of this project is that I have implemented a Plaid API that uses Square to process ACH Bank Transfers. I have also worked in SocketAPI to support live messaging. ”

WORLDCRAFT MLM

Started in 2022, a multi-level marketing for Worldcraft PH. WorldCraft is a subsidiary of Filipinas Multi-line Group of Companies which has been in the importation business for more than 35 years.

“ I started to work on this project in 2022. We have developed an MLM solution to WCPH to encourage more visitors. The main idea here is the upline (user) can earn points from their downlines(user) thru referral link and make them register. The web application uses SSO login that validates the token from our end to their backend. The most challenging part of the project is implementing the network view. I used vis.js here to display and connect nodes for graphical representations of the tree. In 2023, we created 2 similar projects and used the same approach.”

VACAYBUCKS

Started in 2024, a subscription-based discount platform, originally developed exclusively for Vacay Poker Club.

“ I started to work on this project in January 2024. We implemented persistent subscriptions here and notify users when subscriptions end. We used Elavon, a payment processing solution to handle user registration and subscription. ”
