ABOUT

       I have approximately 4 years of experience working as a frontend developer, focused on writing clean, maintainable code and following the best practices such as SOLID, KISS, YAGNI and DRY. Most of my skills are acquired through self-teaching and prepared to carry out tasks outside of my job description when needed. I have a solid understanding in SSR and CSR, caching and performance optimizations to ensure the web application is fast and consistent.

TECH STACK

- ReactJS
- VueJS
- TypeScript
- JavaScript
- TailwindCSS
- Webpack
- ExpressJS
- Sequelize
- CI/CD
- Github Actions

- RESTful, GraphQl
- NextJS
- NodeJS
- Docker
- Kubernetes
- AWS EC2, EKS
- Redux, Vuex
- BootStrap
- GIT
- NGINX

- Internationalization
- CSS, SASS, LESS
- Semantic HTML
- mySQL, MongoDB
- Socket.io
- RTL, Jest/Vitest
- FCM, Firebase Functions
- PWA, Workbox
- Web Accessibility
- Axios, Fetch

WORK EXPERIENCE

OLE Elite Software Philippines, Inc. *- Web Developer*

September 14, 2020 - April 15, 2024

As a web developer, my duties and responsibilities are:

- Designing and developing user interface using modern frontend technologies.
- Translating designs from Figma/AdobeXD to a web component.
- Conducting unit, integration, load and security testing to ensure the quality of the web application.
- Collaboration with UI/UX designers to ensure the mockup designs are feasible and follows the principles of web accessibility.
- Collaboration with backend developers to ensure the implementation of API is secure and efficient.
- Writing documentations for future reference.
- Creating a Github Action pipeline for continuous integration and deployment.
- Debugging issues and resolving tickets given by the software engineer.
- Maintaining and improving the web application features over time.

PROJECTS

Some previews are uploaded and available at **https://lenn0n.xyz/demo**

YAZSEE

Started in 2020, a video streaming website like Youtube that offers opportunities for small content creators to monetize their content. The users can upload videos, go live streaming, set a premier video, create a blog, follow content creators and earn points.
